

GASTROINTESTINAL (GI) TESTING

MD Labs offers RT-qPCR GI testing as part of our gastrointestinal disease testing services. Manage GI infections quickly to avoid delays in diagnosis and help prevent infections from progressing.

Symptoms to Consider

Abdominal Pain	Abnormal loss of weight	Abnormal pain, left quadrant
Blood in stool	Colitis, enteritis, gastroenteritis	Diarrhea of infection origin
Fever	Functional diarrhea	Nausea with vomiting
Viral enteritis, & non-infectious gastroenteritis		

Bacterial Gastroenteritis

Campylobacter spp.	Clostridium difficile	Verotoxin positive E. coli
Enteroinvasive E. coli	Enteropathogenic E. coli	Enterococcus faecalis
Enteraggregative E. coli	Enterotoxigenic E. coli	Enterohemorrhagic E. coli
Salmonella spp.	Shingella spp	Yersinia enterocolitica

Viral Gastroenteritis

Norovirus GI, G2	Adenovirus	Astrovirus
------------------	------------	------------

Stool Parasites

Entamoeba histolytica	Cryptosporidium spp.	Giardia lamblia
-----------------------	----------------------	-----------------

Comprehensive. Time Sensitive. Accurate. MD Labs.

- Identifies pathogens that are difficult to culture
- Unmatched accuracy of qPCR
- Simple collection with a fecal swab
- Personal customer service experience
